

original idea:  
remove micpack  
backing & replace  
with custom  
backing - not  
possible due to  
inability to remove  
mic backing

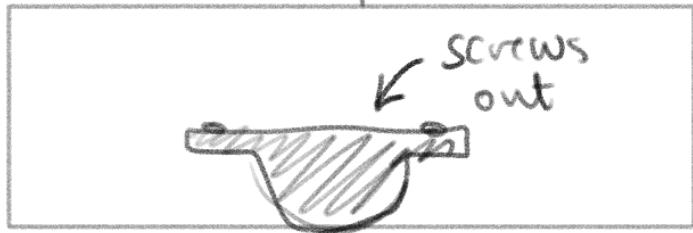

attempt 1: attaching around micpack

attempt 2: attaching from bottom  
of micpack

Bottom of mic pack

custom piece

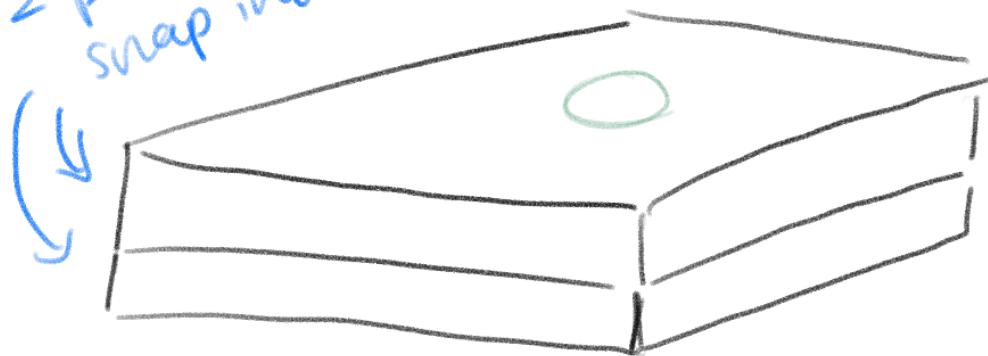

fit's snugly with second piece

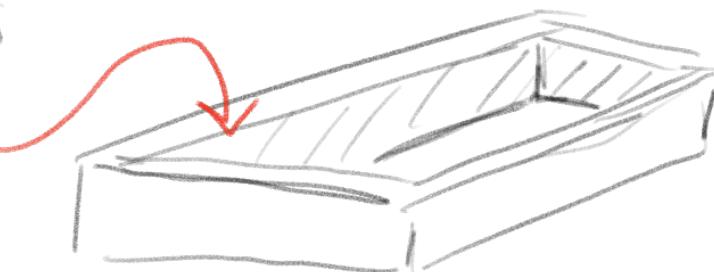

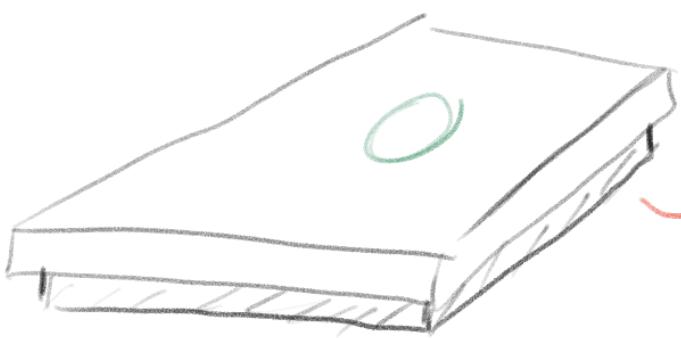

\* Hole for  
buzzer

casing (for Dev Board)

2 pieces that  
snap into each other

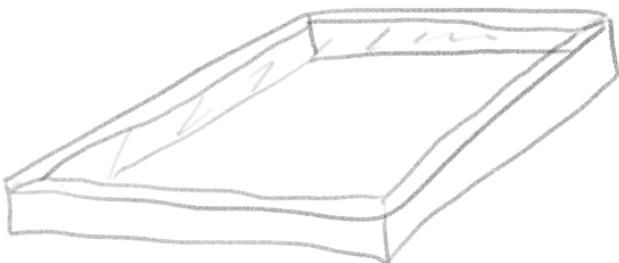

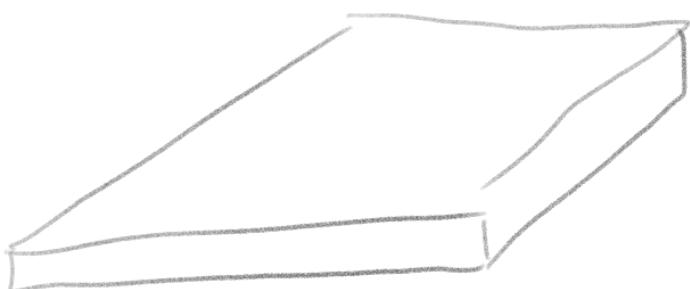

Snaps securely

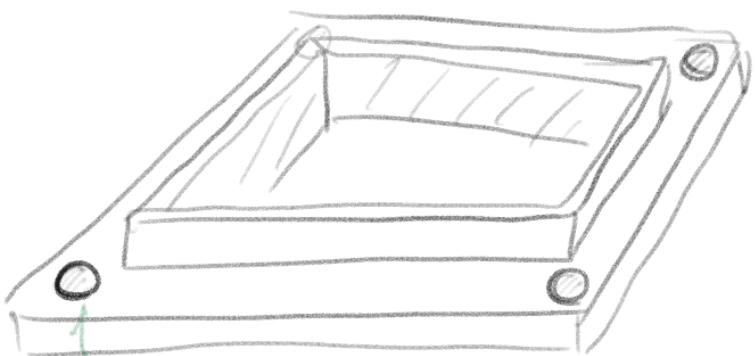

Same concept for transmitter ~

top

bottom

screw holes to  
attach to podium
